

## AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

### Listing of Claims:

1. (Currently amended): Compounds of the general formula I

wherein

R<sup>1</sup> and R<sup>2</sup> are identical or different electron-withdrawing groups or one of R<sup>1</sup> and R<sup>2</sup> is hydrogen and the other of R<sup>1</sup> and R<sup>2</sup> is an electron-withdrawing group each a cyano group,

R<sup>3</sup>, R<sup>4</sup>, R<sup>5</sup> and R<sup>6</sup> are independently selected from hydrogen atoms, unsubstituted C<sub>1</sub>-C<sub>10</sub> alkyl groups, or unsubstituted C<sub>2</sub>-C<sub>10</sub> alkenyl groups, ~~C<sub>2</sub>-C<sub>10</sub> alkynyl groups~~, ~~C<sub>3</sub>-C<sub>10</sub> cycloalkyl groups~~ or ~~C<sub>6</sub>-C<sub>10</sub> aryl groups~~, the above groups being unsubstituted or optionally substituted by one to three substituents selected from C<sub>1</sub>-C<sub>6</sub> alkyl groups, halogen, hydroxy and C<sub>1</sub>-C<sub>6</sub> alkoxy groups, or R<sup>3</sup> and R<sup>5</sup> and/or R<sup>4</sup> and R<sup>6</sup> taken together with the carbon atom to which they

~~are attached form a 5 or 6 membered ring which is optionally substituted with one to four substituents selected from C<sub>1</sub>-C<sub>6</sub> alkyl groups, C<sub>3</sub>-C<sub>6</sub> cycloalkyl groups, C<sub>1</sub>-C<sub>6</sub> alkoxy groups, hydroxy or halogen,~~

X is ~~a hydrocarbon group containing 1 to 20 carbon atoms and optionally 1 to 10 hetero atoms and comprising at least one group~~ an alkyl, alkylaryl or alkyl cycloalkyl group containing 1 to 20 carbon atoms and optionally 1 to 10 hetero atoms, and comprising at least one group including at least one hetero atom which is positively or negatively charged<sub>1</sub> and

Y is a counterion.

2. (Currently amended): Compound according to claim 1, wherein X is an alkyl, alkylaryl or alkyl cycloalkyl group containing 1 to 20 carbon atoms and ~~optionally~~ 1 to 10 hetero atoms<sub>1</sub> and comprising at least one group including at least one hetero atom which is positively or negatively charged.

3. (Currently amended): Compound according to claim 2, wherein X is a C<sub>1</sub>-C<sub>10</sub> alkylene group containing ~~optionally~~ 1 to 10 hetero atoms<sub>1</sub> and comprising at least one group including at least one hetero atom which is positively or negatively charged.

4. (Previously presented): Compound according to claim 1, wherein X contains 1 to 6 hetero atoms.

5. (Original): Compound according to claim 4, wherein the hetero atoms are selected from nitrogen, oxygen, sulfur and phosphor atoms.

6. (Currently amended): Compound according to claim 1, wherein the at least one group including at least one hetero atom which is positively or negatively charged has one positive charge.

7. (Currently amended): Compound according to claim 6, wherein the at least one group which has one positive charge is a quaternary ammonium group.

8. (Original): Compound according to claim 7, wherein Y is a halogen atom.

9. (Currently amended): Compound according to claim 1, wherein the at least one group which is positively or negatively charged has one negative charge.

10. (Currently amended): Compound according to claim 9, wherein the at least one group which has one negative charge is selected from a the group consisting of  $\text{-COO}^-$ ,  $\text{-O-SO}_3^-$  and  $\text{-O-P(=O)(OH)}_2$ .

11. (Currently amended): Compound according to claim 10, wherein Y is selected from the group consisting of an alkaline metal atom, an earth alkaline metal atom, a triethanol ammonium ion, an aminomethylpropanol ion, and ~~or~~ a ~~tris(tromethamine)~~ tris(tromethamine) ion.

12. (Previously presented): Compound according to claim 1, wherein residue  $\text{R}^3$  and  $\text{R}^4$  are each hydrogen atoms.

13. (Previously presented): Compound according to claim 1, wherein residues R<sup>5</sup> and R<sup>6</sup> are independently selected from hydrogen atoms and C<sub>1</sub>-C<sub>6</sub> alkyl groups.

14. (Canceled).

15. (Currently amended): Compound according to claim 1, selected from the group consisting of:

16. (Previously presented): UV-A screening composition comprising a compound according to claim 1.

17. (Original): UV-A screening composition according to claim 16, which is a cosmetic composition for protecting skin or hair against UV-A radiation.

18. (Withdrawn): UV-A screening composition according to claim 16, comprising one or more additional sunscreens selected from the group consisting of a micronised pigment and a polymeric UV-sunscreen.

19. (Withdrawn): UV-A screening composition according to claim 18, wherein the micronised pigment is microparticulated  $\text{TiO}_2$  of a particle size of about 5 nm to about 200 nm.

20. (Withdrawn): UV-A screening composition according to claim 18, wherein the polymeric UV-sunscreen is an organosiloxane.

21. (Withdrawn): UV-A screening composition according to claim 20, wherein the organosiloxane is an organosiloxane which contains benzmalonate groups.

22. (Canceled).
